

## Surgical Treatment of Pelvic Organ Prolapse & Stress Urinary Incontinence

11 May 2023, 09:00 AM – 12:00 PM (CEST)

### Bilateral Apical Fixation

A New Standard in Laparoscopic Pelvic Organ Prolapse Surgery

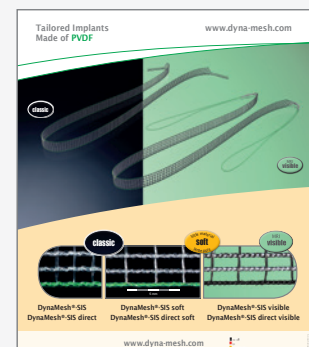

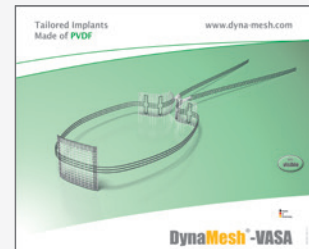

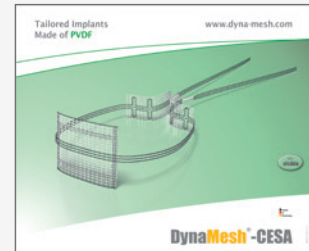

The focus of the training is on the application of minimally invasive laparoscopic surgery in all areas of operative gynaecology.

- Decensus surgery with organ preservation and best possible reconstruction of physiological functions
- Surgical treatment of stress urinary incontinence using the transvaginal tape technique (TVT)
- Avoidance of mesh complications through correct, anatomical ligament replacement, with the guiding principle: „As little mesh as necessary, as correct as possible“

LiSTO.academy offers a digital live surgery training with real-time verbal interaction between surgeons and participants throughout the entire surgical procedure.

Stefan Bettin, M.D.  
Head Physician of the Gynaecological Clinic  
St. Ansgar Krankenhaus Hörter, Germany
